

# Assure Lite

Affordable classroom management and online safety solution for schools beginning their digital wellbeing journey.

## Simple Digital Safety for Schools

Many small schools, those with straightforward ICT needs, or those just beginning their digital wellbeing journey often lack a clear, unified view of students' online activity. Without this visibility, it's difficult to develop evidence-based safety policies, guide appropriate online behaviour, and respond effectively to incidents. Fragmented tools can slow investigations, complicate reporting, and leave gaps in duty of care.

Assure Lite provides a simple, consolidated view of student online behaviour through role-based dashboards, detailed reports, and three months of activity history. This visibility empowers quick investigations, supports leadership-ready evidence, and enables consistent policy decisions. As needs grow, Assure Lite can expand with web filtering, home-school transparency, and learning platform integration.

## What Are The Benefits?

### 1 Visibility of Student Activity

A K-12 centric view of student online activity enables timely investigations, demonstrates compliance, and supports duty-of-care.

### 2 Evidence for Leadership

Clear, role-aligned reports deliver leadership-ready evidence of digital policy effectiveness, student usage trends, and behavioural insights.

### 3 Policy Design & Education

Behaviour insights support policy development and help guide student conversations around appropriate online conduct.

### 4 Start Small and Grow Over Time

Start small and expand over time by adding modules without disrupting workflows, retraining staff, or changing existing systems and processes.

# Assure Lite Capabilities

## Role-Based Dashboards

IT, Wellbeing, Teachers & Principals can access insights quickly without complex setup or ongoing training.

## Online Activity Reports

Customisable and comprehensive activity reports for audits, policy development and incident management.

## 3-Months Rolling Data

Keeps recent history for incident reviews, trend analysis and leadership reporting needs.

## Cloud-Based Deployment

Rapid rollout and minimal upkeep for small teams, easy access for authorised staff.

## Extend Capabilities with Add-On Modules

### On-Premises Web Filter

Delivers robust, school-wide web filtering without device agents.

### On-Device Web Filter

Keeps students safe online, anywhere they learn.

### Parent Portal

Extends digital well-being from school to home for whole-of-school safety.

### LMS Connector

Empowers teachers with real-time classroom control from within their LMS.
