

ADD ON MODULE FOR
STANDARD

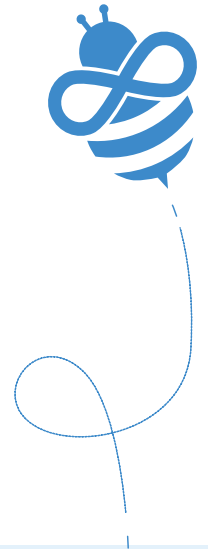

3rd Party Firewall Controls

Extended classroom control and centralised oversight, integrated with existing network setups for greater flexibility and management.

Unified Layer of Student Digital Safety

Third-party firewalls protect the school network, but often lack the flexibility needed to support classroom needs. This can make it difficult to meet duty-of-care obligations and maintain clear visibility of student activity over time.

The 3rd Party Firewall Controls module, an extension to Assure Standard, enhance web access management by integrating with existing Palo Alto Networks® or Fortinet® firewalls. Schools can continue using their current network setup without disruption, while teachers and IT teams gain the ability to apply flexible, class-based web access policies directly through Assure.

What Are The Benefits?

- 1 School-Ready Firewalls**

Add Assure's education layer to your existing Palo Alto Networks® or Fortinet® firewalls for classroom-aware control.
- 2 Protect Existing IT Investments**

Extend Assure over current firewalls; avoid replacement, minimise disruption, lower costs.
- 3 Meet Duty-of-Care Compliance**

Maintain unified activity logs and reporting to support your school's duty-of-care responsibilities.
- 4 Teacher-led, IT Governed Controls**

Enable real-time lesson access and control for teachers, governed by IT and aligned with K-12 safety standards.
- 5 Precise, Education Aware Policies**

Apply precise, education-aware rules to enforce school policies and keep students focused.

3rd Party Firewall Controls Capabilities

Support for Palo Alto® & Fortinet® Firewalls

Extend Assure into existing Palo Alto® or Fortinet® firewalls—no replacements needed. Maintain continuity and reduce costs with seamless policy extension.

Granular Permissions

Set access by student, staff, year level or subject. Align permissions with school safeguarding policies for precise control.

Centralised Policy Management

Manage Assure and firewall rules from a single pane of glass. Simplify administration, reduce workload, and improve visibility.

Teacher-led Classroom Control

Enable teacher-led web and app access during lessons. Support focused learning with policy-aligned, real-time controls.

K-12 Ready with Palo Alto® and Fortinet®

Saasyan has partnered with **Palo Alto® Networks** and **Fortinet®**, integrating Assure with their next-gen firewalls to deliver K-12-ready classroom controls, reporting, and policy management for schools.
