

Collaboration Connector

Student safeguarding beyond web browsing, ensuring visibility into the collaboration platforms where students learn, share, and communicate daily.

Full Visibility Across Collaboration Tools

Online safety blind spots in Teams, Outlook, Google Chat, Gmail, Docs, and Drive can let risky content slip past traditional web filters. IT teams often lack scalable, low-touch coverage across these platforms, while school leaders need real-time visibility and defensible audit trails. Inconsistent alerts and manual investigations slow responses to issues like self-harm, bullying, threats, and explicit content, posing serious risks to compliance, duty-of-care, and school reputation.

The Collaboration Connector, an extension to Assure Standard, closes the gap between web filtering and overlooked interactions in collaboration tools. AI-powered analysis flags concerning content in chats, emails, documents, and shared files, giving schools full visibility before harmful behaviour escalates.

What Are The Benefits?

- 1 Complete Coverage**

Extends protection across Microsoft 365 and Google Workspace, closing safety gaps in student collaboration tools.
- 2 Smart Content Detection**

Identifies harmful or inappropriate material in uploads and attachments that basic text filters miss.
- 3 Customised Safeguards**

Adjust policies and thresholds to suit different year levels and meet school compliance standards.
- 4 Context-Aware Alerts**

AI reveals the intent behind messages, helping staff respond with clarity and confidence.
- 5 Detect and Intervene Early**

Gain timely insights that enable faster, more targeted student support when it matters most.

Collaboration Connector Capabilities

Cyberbullying Detection

Detects harmful content across chats, email, documents, and shared media, enabling early staff action.

Self-Harm Alerts

Identifies signs of self-harm or suicide risk across collaboration platforms, triggering alerts to wellbeing staff.

Threat Detection

Flags violent or threatening messages and images across platforms for fast, proactive safety response.

Content Monitoring

Scans shared files, images, and media for explicit, harmful, or unsafe content before it spreads across platforms.

Age-Based Safeguarding

Applies tailored detection thresholds to suit different year levels and meet compliance requirements.

Wellbeing Alerts

Delivers timely, actionable alerts to wellbeing teams, helping them support students when needed most.

Support for

Google Workspace

Microsoft 365
