

Assure Standard

Detect digital risks early with AI-powered digital activity monitoring, enabling proactive intervention, ensuring compliance, and upholding duty of care.

Smart Digital Safety for Schools

Online harm is growing across websites, social media, streaming platforms, search engines, messaging apps, and generative AI tools. Manual monitoring can't keep up, missing early warning signs, delaying investigations, and putting duty of care, compliance, and learning time at risk.

Assure Standard delivers K–12-specific, inference-only AI that continuously analyses student digital activity, detects risks, and sends role-based alerts in real-time. With 12 months of searchable history and exportable reports, schools can investigate faster, meet school compliant AI standards, and intervene earlier, without replacing existing infrastructure.

As school needs evolve, optional add-on modules extend coverage and controls, allowing Assure Standard to scale confidently and meet future digital safety requirements.

What Are The Benefits?

- 1 Visibility & Alerting**

Real-time risk detection across browsing, search, streaming, social media and AI prompts with role-based alerts.
- 2 Fast, Targeted Interventions**

Fast, role-based alerts drive targeted interventions and timely, appropriate student support.
- 3 School Compliant Inference-Only AI**

School-compliant AI prioritises consent, data minimisation, oversight, and transparent, auditable outcomes by default.
- 4 Investigations & Audits**

Auditable trails and year-long history empower informed investigations and policy-aligned decisions.
- 5 Whole-School Safety**

Role-based dashboards deliver necessary context to Principals, Wellbeing, and IT, strengthening school-wide safety.

Assure Standard Capabilities

AI Alerts & Monitoring

AI-powered monitoring covers web, search, streaming, social media and prompts, delivering role-based alerts.

Inference-only K-12 AI

School-compliant, inference-only AI leverages purpose built classifiers for text, image, and object analysis.

Role-Based Dashboards

Contextual, role-specific dashboards reduce noise, ensure authorised access, and coordinate schoolwide response.

Online Activity Reports

Customisable and comprehensive activity reports for audits, policy development and incident management.

12-Months Rolling Data

Year-long, chronological records enable audits, investigations, trend analysis, and schoolwide compliance assurance.

Cloud-Based Deployment

Rapid rollout and minimal maintenance for IT teams, easy access for authorised staff.

Extend Capabilities with Add-On Modules

On-Premises Web Filter

Delivers robust, school-wide web filtering without device agents.

On-Device Web Filter

Keeps students safe online, anywhere they learn.

Parent Portal

Extends digital well-being from school to home for whole-of-school safety.

LMS Connector

Empowers teachers with real-time classroom control from within their LMS.

3rd Party Firewall Connector

Extend web access rules across the school's existing firewalls.

Collaboration Connector

AI-powered monitoring for Google Workspace and Microsoft 365.

Data Archiving

Long-term storage > 12 months for digital safety records.
